Ivar Grimstad - PMC Representative
Marcelo Ancelmo - Participant Member - Abraham Marin-Perez
Werner Keil - Committer Member
Scott Stark - Red Hat - Scott Marlow Enterprise Member
Zhai Luchao - Shandong Cvicse Middleware Co. - Enterprise Member

Guests - Jakarta EE 11 co-release coordinators: **Ed Burns**, Arjan Tijms

Eclipse Foundation: **Tanja Obradovic, Wayne Beaton, Paul Buck** (chair)

Past business / action items:
- Approval is requested for the minutes from the September 6th, 2023 meeting as drafted - Approved.

Agenda:
- Ongoing tracking [spreadsheet](#) of specifications progressing through the [JESP](#) version [lifecycle](#)
  See the spreadsheet for updates.
  Notes from 09/05 call:
    1. Scott to notify the EMO to provide guidance on question of is an new ballot required for the proposed refactoring of the CDI specification to break out the integration elements
    2. Question/discussion with regards to where "integration" specifications should live? Web Profile? What about the related TCK artifacts (which when passed bind IP)? Scott to follow up on this one.
  [09/19] Check in on where this one is at
  Topic deferred to the October 4th call
- The [Jakarta EE Versioning, Change, and Deprecation Process](#) was finalized and ballot concluded successfully [See https://www.eclipse.org/lists/jakarta.ee-spec.committee/msg03417.html]
  - Next steps:
    - Refer process to the Steering Committee for ratification
    - Update the website with the new document

Need to determine where best to link this revised process which is wider in scope, suggestion is to put it on https://jakarta.ee/committees/specification/, also then send an email to the Spec Discussions mailing list

- Seek exception from Jakarta Faces to remove the apis without going through the deprecation stage. It was discussed at this week's Platform call and it was approved there.
  - `https://github.com/jakartaee/faces/issues/1549` - `composite:extension tag (tag created, but never implemented behavior)`
  - `https://github.com/jakartaee/faces/issues/1707` - `PreDestroyCustomScopeEvent and PostConstructCustomScopeEvent classes (not used due to the removal of JSF managed beans)`
  - `https://github.com/jakartaee/faces/issues/1725` - `UIComponent.bindings field (should have been removed in Faces 4.0)`

  Does the Specification Committee approve this exception request? No objections noted, this request is approved.

- Restructuring review for Jakarta Bean Validation to Jakarta Validation. https://gitlab.eclipse.org/eclipsefdn/emo-team/emo/-/issues/581

  EMO indicated that this change in progress and the webmaster was encouraged to move this one forward

- [Emily] See the issues in the board for updates
  - Emily agree to help progress issues #57 and #59 (also see PR #1679)
  - 05/31 see the issues for Emily's updates
  - 06/14 issues discussed, see issues and PR for updates
  - 06/28 reviewed the issues and PR

  PR to be merged, and another PR created to further explain Type 3's "all modes".
